WORK EXPERIENCE

Administrative Assistant, Mid-Peninsula Dental Group May 2024 – Present | Belmont, California

- Maintains computers, software applications, and electronic dental equipment to support consistent day-to-day office operations.
- Schedules and coordinates appointments for approximately 16 patients daily, minimizing conflicts and keeping front-office operations running without stalls.
- Serves as first point of contact for patients, resolving scheduling and filing needs proactively while maintaining accurate digital records.

Frontend Developer & UX/UI Designer, AcePrep April 2026 – May 2026 | California

- Designed and implemented responsive user interfaces, translating wireframes and mockups into production-ready experiences for 85+ registered users.
- Built a file upload modal, an interactive product tour for the syllabus and home calendar, and a file-processing loading component, each delivered on deadline and approved by the engineering lead.
- Implemented a calendar-switching button and integrated existing back-end functionality with loading states, transitions, and cross-browser-compatible components from Figma specifications under specified deadlines.

Data Structures and Algorithms Teaching Assistant, Loyola Marymount University August 2023 – May 2024 | Los Angeles, California

- Supported 75+ students in data structures and algorithms through personalized tutoring, clarifying concepts such as trees, graphs, and sorting.
- Answered student questions on homework and course material in real time, resolving inquiries within scheduled office hours.
- Handled grading and feedback in collaboration with professors, completing grading within each session and reducing faculty workload by 3 hours weekly.

Distribution Center Student Worker, Loyola Marymount University August 2022 – May 2024 | Los Angeles, California

- Processed and sorted incoming packages across campus departments, maintaining accuracy to prevent misdeliveries during high-volume periods such as the start of each semester.
- Batched incoming volume by category and destination to manage a single-computer processing bottleneck, coordinating with teammates to keep pace with demand.
- Coordinated with campus teams on student package logistics, assisting students and staff with delivery inquiries and status updates.

PROJECTS

Interactive Game Development - Unity February 2023 – May 2024

- Developed Keyboard Warrior using C# scripting, implementing real-time typing input validation, score tracking, and dynamic difficulty scaling mechanics.
- Built Quickcast, a gesture-controlled "shoot 'em up" integrating the Point-Cloud Gesture Recognizer for real-time spell-casting recognition and combat interactions.
- Designed core gameplay loops and input systems from scratch for both projects, prioritizing responsive, satisfying player experience through iterative playtesting and tuning.

Blendify - Music Web Application September 2023 – December 2023

- Managed a small team for a React-based music recommendation platform, leading wireframe development and contributing direct front-end work to improve navigation and user experience.
- Collaborated with back-end developers to integrate Spotify API data into OAuth-authenticated user sessions, enabling BPM-based song recommendations.
- Weighed ideal interaction design against what the API integration could realistically support on our timeline, simplifying select interactions upfront so wireframes translated cleanly into a shipped product.

EDUCATION

Loyola Marymount University May 2024 | Los Angeles, CA

Bachelor of Science, Computer Science; Minor in Interactive, Gaming, and Immersive Media

- GPA — 3.89; *Magna Cum Laude*
- Campus Activities — Graphic designer for Japanese Cultural Club (*Nikkei*) and LMU Asian American Symposium

SKILLS

- **Languages** — C#, TypeScript, HTML, CSS, JavaScript, Java, Python, C, C++, Swift
- **Frameworks & Technologies** — React, Node.js, Unity, Git, Figma, Mantine UI
