EDUCATION

Loyola Marymount University

May 2024

Bachelor of Science, Computer Science; *Minor in Interactive, Gaming, and Immersive Media*

Los Angeles, CA

- **GPA: 3.89; Magna Cum Laude**
- **Campus Activities:** *Graphic designer for Japanese Cultural Club (Nikkei) and LMU Asian American Symposium*

WORK EXPERIENCE

Data Structures and Algorithms Teaching Assistant

August 2023 – May 2024

Loyola Marymount University

Los Angeles, CA

- Led over 75 students in improving their understanding of data structures and algorithms by curating personalized lessons for individual students, focusing on Python-based assignments.
- Collaborated with professors to manage grading responsibilities, ensuring timely feedback while reducing their workload by 3 hours per week.

Distribution Center Student Worker

August 2022 – May 2024

Loyola Marymount University

Los Angeles, CA

- Engaged with supervisors and other teams to deliver and sort received packages efficiently, ensuring timely distribution across campus departments.
- Organized logistical collaboration between multiple other departments to process student packages and provided customer service support to effectively run the university's mail system.

PROJECTS

Interactive Game Development – Unity Projects

- **Keyboard Warrior:** Designed a dynamic typing-based game to help users improve their typing accuracy and speed, integrating game mechanics to progressively increase difficulty and reinforce learning in an engaging manner.
- **Quickcast:** Developed a spell-casting “shoot ‘em up”, utilizing the Point-Cloud Gesture Recognizer tool from the Unity Asset Store to successfully integrate advanced gesture recognition capabilities to achieve accurate and responsive spell-casting mechanics.

Blendify - Music Web Application

- Led a small development team as project manager, designed and implemented the UI framework in React.js, establishing front-end standards and ensuring a cohesive user experience for the music curation interface.
- Engaged with back-end developers to integrate data from the Spotify API, aligning front-end components with OAuth-authenticated user sessions to enable beats-per-minute-based song recommendations.

SussyScript - Custom Programming Language

- Developed a JavaScript-based programming language inspired by Among Us, to provide a fun and accessible learning tool for beginner programmers.
- Created a custom JavaScript compiler for SussyScript using Ohm to define grammar and handle syntax parsing, optimizing for clear syntax handling and error-free execution, making it easier for beginners to understand and use programming concepts.

SKILLS & INTERESTS

- **Languages:** C#, TypeScript, HTML, CSS, JavaScript, Java, Python, C, C++, Swift
- **Frameworks/Technologies:** Node.js, Mantine UI, Figma UX/UI, Git
